

Policy Document for: Data Protection (GDPR)

Due for Review: Spring 2027

Additions/amendments in this version

April 2026	Review policy against model – re-written to the latest model policy

Statement of intent

Our Trust aims to ensure that all personal data collected about staff, pupils, parents and carers, governors, visitors and other individuals is collected, stored and processed in accordance with UK data protection law.

This policy applies to all personal data, regardless of whether it is in paper or electronic format.

The Trust may, from time to time, be required to share personal information about its staff or pupils with other organisations, mainly the LA, other schools and educational bodies, and potentially social services. This policy is in place to ensure all staff and trustees/governors are aware of their responsibilities and outlines how the trust complies with the following core principles of the GDPR.

Organisational methods for keeping data secure are imperative, and BA MAT Trust believes that it is good practice to keep clear practical policies, backed up by written procedures.

Legal framework

This policy has due regard to legislation, including, but not limited to the following:

- UK General Data Protection Regulation (UK GDPR) – the EU GDPR was incorporated into UK legislation, with some amendments, by [The Data Protection, Privacy and Electronic Communications \(Amendments etc\) \(EU Exit\) Regulations 2020](#)
- [Data Protection Act 2018 \(DPA 2018\)](#)

It is based on guidance published by the Information Commissioner's Office (ICO) on the [UK GDPR](#) and guidance from the Department for Education (DfE) on [Generative artificial intelligence in education](#).

- It also reflects the ICO's [guidance](#) for the use of surveillance cameras and personal information.
- In addition, this policy complies with regulation 5 of the [Education \(Pupil Information\) \(England\) Regulations 2005](#), which gives parents the right of access to their child's educational record.

In addition, this policy complies with our funding agreement and articles of association.

This policy will be implemented in conjunction with the following other trust policies:

- Online-safety Policy
- Freedom of Information Policy

Definitions

TERM	DEFINITION
Personal data	Any information relating to an identified, or identifiable, living individual. This may include the individual's: • Name (including initials) • Identification number • Location data • Online identifier, such as a username It may also include factors specific to the individual's physical, physiological, genetic, mental, economic, cultural or social identity.
Special categories of personal data	Personal data which is more sensitive and so needs more protection, including information about an individual's: • Racial or ethnic origin • Political opinions • Religious or philosophical beliefs • Trade union membership • Genetics • Biometrics (such as fingerprints, retina and iris patterns), where used for identification purposes • Health – physical or mental • Sex life or sexual orientation
Processing	Anything done to personal data, such as collecting, recording, organising, structuring, storing, adapting, altering, retrieving, using, disseminating, erasing or destroying. Processing can be automated or manual.
Data subject	The identified or identifiable individual whose personal data is held or processed.
Data controller	A person or organisation that determines the purposes and the means of processing personal data.
Data processor	A person or other body, other than an employee of the data controller, who processes personal data on behalf of the data controller.
Personal data breach	A breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to, personal data.

Applicable data

For the purpose of this policy, personal data refers to information that relates to an identifiable, living individual, including information such as an online identifier, such as an IP address. The GDPR applies to both automated personal data and to manual filing systems, where personal data is accessible according to specific criteria, as well as to chronologically ordered data and pseudonymised data, e.g. key-coded.

Sensitive personal data is referred to in the GDPR as 'special categories of personal data', which are broadly the same as those in the Data Protection Act (DPA) 1998. These specifically include the processing of genetic data, biometric data and data concerning health matters.

Roles and responsibilities

This policy applies to **all staff** employed by our Trust schools, and to external organisations or individuals working on our behalf. Staff who do not comply with this policy may face disciplinary action.

Governing board

The governing board has overall responsibility for ensuring that our schools comply with all relevant data protection obligations.

Data protection officer (DPO)

The data protection officer (DPO) in each school is responsible for overseeing the implementation of this policy, monitoring our compliance with data protection law, and developing related policies and guidelines where applicable.

They will provide an annual report of their activities directly to the governing board and, where relevant, report to the board their advice and recommendations on school data protection issues.

The DPO is also the first point of contact for individuals whose data the school processes, and for the ICO.

Full details of the DPO's responsibilities are set out in their job description.

Our DPO is the Head in each school and is contactable via the school office.

Sufficient resources will be provided to the DPO to enable them to meet their GDPR obligations – they will liaise with Satswana who are the Trust advisors.

All staff

Staff are responsible for:

- Collecting, storing and processing any personal data in accordance with this policy
- Informing the school of any changes to their personal data, such as a change of address
- Contacting the DPO in the following circumstances:
 - With any questions about the operation of this policy, data protection law, retaining personal data or keeping personal data secure
 - If they have any concerns that this policy is not being followed
 - If they are unsure whether or not they have a lawful basis to use personal data in a particular way
 - If they need to rely on or capture consent, draft a privacy notice, deal with data protection rights invoked by an individual, or transfer personal data outside the UK
 - If there has been a data breach
 - Whenever they are engaging in a new activity that may affect the privacy rights of individuals
 - If they need help with any contracts or sharing personal data with third parties

Principles

In accordance with the requirements outlined in the GDPR, personal data will be:

- Processed lawfully, fairly and in a transparent manner in relation to individuals.
- Collected for specified, explicit and legitimate purposes and not further processed in a manner that is incompatible with those purposes; further processing for archiving purposes in the public interest, scientific or historical research purposes or statistical purposes shall not be considered to be incompatible with the initial purposes.
- Adequate, relevant and limited to what is necessary in relation to the purposes for which they are processed.
- Accurate and, where necessary, kept up-to-date; every reasonable step must be taken to ensure that personal data that are inaccurate, having regard to the purposes for which they are processed, are erased or rectified without delay.
- Kept in a form which permits identification of data subjects for no longer than is necessary for the purposes for which the personal data are processed; personal data may be stored for longer periods, insofar as the personal data will be processed solely for archiving purposes in the public interest, scientific or historical research purposes or statistical purposes, subject to implementation of the appropriate technical and organisational measures required by the GDPR in order to safeguard the rights and freedoms of individuals.

- Processed in a manner that ensures appropriate security of the personal data, including protection against unauthorised or unlawful processing and against accidental loss, destruction or damage, using appropriate technical or organisational measures.

The GDPR also requires that “the controller shall be responsible for, and able to demonstrate, compliance with the principles”.

Collecting personal data

Lawfulness, fairness and transparency

We will only process personal data where we have 1 of 6 ‘lawful bases’ (legal reasons) to do so under data protection law:

- The data needs to be processed so that the school can **fulfil a contract** with the individual, or the individual has asked the school to take specific steps before entering into a contract
- The data needs to be processed so that the school can **comply with a legal obligation**
- The data needs to be processed to ensure the **vital interests** of the individual or another person i.e. to protect someone’s life
- The data needs to be processed so that the school, as a public authority, can **perform a task in the public interest or exercise its official authority**
- The data needs to be processed for the **legitimate interests** of the school (where the processing is not for any tasks the school performs as a public authority) or a third party, provided the individual’s rights and freedoms are not overridden
- The individual (or their parent/carers when appropriate in the case of a pupil) has freely given clear **consent**

For special categories of personal data, we will also meet 1 of the special category conditions for processing under data protection law:

- The individual (or their parent/carers when appropriate in the case of a pupil) has given **explicit consent**
- The data needs to be processed to perform or exercise obligations or rights in relation to **employment, social security or social protection law**
- The data needs to be processed to ensure the **vital interests** of the individual or another person, where the individual is physically or legally incapable of giving consent
- The data has already been made **manifestly public** by the individual
- The data needs to be processed for the establishment, exercise or defence of **legal claims**
- The data needs to be processed for reasons of **substantial public interest** as defined in legislation
- The data needs to be processed for **health or social care purposes**, and the processing is done by, or under the direction of, a health or social work professional or by any other person obliged to confidentiality under law
- The data needs to be processed for **public health reasons**, and the processing is done by, or under the direction of, a health professional or by any other person obliged to confidentiality under law
- The data needs to be processed for **archiving purposes**, scientific or historical research purposes, or statistical purposes, and the processing is in the public interest

For criminal offence data, we will meet both a lawful basis and a condition set out under data protection law. Conditions include:

- The individual (or their parent/carers when appropriate in the case of a pupil) has given **consent**
- The data needs to be processed to ensure the **vital interests** of the individual or another person, where the individual is physically or legally incapable of giving consent
- The data has already been made **manifestly public** by the individual
- The data needs to be processed for or in connection with legal proceedings, to obtain legal advice, or for the establishment, exercise or defence of **legal rights**
- The data needs to be processed for reasons of **substantial public interest** as defined in legislation

Whenever we first collect personal data directly from individuals, we will provide them with the relevant information required by data protection law.

We will always consider the fairness of our data processing. We will ensure we do not handle personal data in ways that individuals would not reasonably expect, or use personal data in ways which have unjustified adverse effects on them.

Limitation, minimisation and accuracy

We will only collect personal data for specified, explicit and legitimate reasons. We will explain these reasons to the individuals when we first collect their data.

If we want to use personal data for reasons other than those given when we first obtained it, we will inform the individuals concerned before we do so, and seek consent where necessary.

Staff must only process personal data where it is necessary in order to do their jobs.

We will keep data accurate and, where necessary, up to date. Inaccurate data will be rectified or erased when appropriate.

In addition, when staff no longer need the personal data they hold, they must ensure it is deleted or anonymised. This will be done in accordance with the Trust record retention schedule.

Accountability

- BA MAT will implement appropriate technical and organisational measures to demonstrate that data is processed in line with the principles set out in the GDPR.
- The trust will provide comprehensive, clear and transparent privacy policies.
- Records of activities relating to higher risk processing will be maintained, such as the processing of special categories data or that in relation to criminal convictions and offences.
- Internal records of processing activities will include the following:
 - Name and details of the organisation
 - Purpose(s) of the processing
 - Description of the categories of individuals and personal data
 - Retention schedules
 - Categories of recipients of personal data
 - Description of technical and organisational security measures
 - Details of transfers to third countries, including documentation of the transfer mechanism safeguards in place

The trust will implement measures that meet the principles of data protection by design and data protection by default, such as:

- Data minimisation.
- Pseudonymisation.
- Transparency.
- Allowing individuals to monitor processing.
- Continuously creating and improving security features.

Data protection impact assessments will be used, where appropriate.

Sharing personal data

We will not normally share personal data with anyone else without consent, but there are certain circumstances where we may be required to do so. These include, but are not limited to, situations where:

- There is an issue with a pupil or parent/carer that puts the safety of our staff at risk
- We need to liaise with other agencies – we will seek consent as necessary before doing this
- Our suppliers or contractors need data to enable us to provide services to our staff and pupils – for example, IT companies. When doing this, we will:

- Only appoint suppliers or contractors that can provide sufficient guarantees that they comply with UK data protection law
- Establish a contract with the supplier or contractor to ensure the fair and lawful processing of any personal data we share
- Only share data that the supplier or contractor needs to carry out their service

We will also share personal data with law enforcement and government bodies where we are legally required to do so.

We may also share personal data with emergency services and local authorities to help them to respond to an emergency situation that affects any of our pupils or staff.

Where we transfer personal data internationally, we will do so in accordance with UK data protection law.

Lawful processing

The legal basis for processing data will be identified and documented prior to data being processed.

Under the GDPR, data will be lawfully processed under the following conditions:

- The consent of the data subject has been obtained.
- Processing is necessary for:
 - Compliance with a legal obligation.
 - The performance of a task carried out in the public interest or in the exercise of official authority vested in the controller.
 - For the performance of a contract with the data subject or to take steps to enter into a contract.
 - Protecting the vital interests of a data subject or another person.
 - For the purposes of legitimate interests pursued by the controller or a third party, except where such interests are overridden by the interests, rights or freedoms of the data subject.

Sensitive data will only be processed under the following conditions:

- Explicit consent of the data subject, unless reliance on consent is prohibited by EU or Member State law.
- Processing carried out by a not-for-profit body with a political, philosophical, religious or trade union aim provided the processing relates only to members or former members (or those who have regular contact with it in connection with those purposes) and provided there is no disclosure to a third party without consent.
- Processing relates to personal data manifestly made public by the data subject.
- Processing is necessary for:
 - Carrying out obligations under employment, social security or social protection law, or a collective agreement.
 - Protecting the vital interests of a data subject or another individual where the data subject is physically or legally incapable of giving consent.
 - The establishment, exercise or defence of legal claims or where courts are acting in their judicial capacity.
 - Reasons of substantial public interest on the basis of Union or Member State law which is proportionate to the aim pursued and which contains appropriate safeguards.
 - The purposes of preventative or occupational medicine, for assessing the working capacity of the employee, medical diagnosis, the provision of health or social care or treatment or management of health or social care systems and services on the basis of Union or Member State law or a contract with a health professional.
 - Reasons of public interest in the area of public health, such as protecting against serious cross-border threats to health or ensuring high standards of healthcare and of medicinal products or medical devices.
 - Archiving purposes in the public interest, or scientific and historical research purposes or statistical purposes in accordance with Article 89(1).

CCTV

- The trust understands that recording images of identifiable individuals constitutes as processing personal information, so it is done in line with data protection principles.
- The trust notifies all pupils, staff and visitors of the purpose for collecting CCTV images via notice boards and our CCTV policy which is published on our website.
- Cameras are only placed where they do not intrude on anyone's privacy and are necessary to fulfil their purpose.
- All CCTV footage will be kept for a maximum of 16 days for security purposes; the CEO is responsible for keeping the records secure and allowing access.

sites to ensure it remains safe. We will follow the [ICO's guidance](#) for the use of CCTV, and comply with data protection principles.

We do not need to ask individuals' permission to use CCTV, but we make it clear where individuals are being recorded. Security cameras are clearly visible and accompanied by prominent signs explaining that CCTV is in use.

Any enquiries about the CCTV system should be directed to the Head in each school.

See also the CCTV policy

Photographs and videos

The Trust schools will always indicate their intentions for taking photographs of pupils and will retrieve permission before publishing them.

We use CCTV in various locations around the school

As part of our school activities, we may take photographs and record images of individuals within our school.

We will obtain written consent from parents/carers for photographs and videos to be taken of their child for communication, marketing and promotional materials. We will clearly explain how the photograph and/or video will be used to both the parent/carer and the pupil.

Any photographs and videos taken by parents/carers at school events for their own personal use are not covered by data protection legislation. However, we will ask that photos or videos with other pupils are not shared publicly on social media for safeguarding reasons, unless all the relevant parents/carers have agreed to this.

Where the school takes photographs and videos, uses may include:

- Within school on notice boards and in school magazines, brochures, newsletters, etc.
- Outside of school by external agencies such as the school photographer, newspapers, campaigns
- Online on our school website or social media pages

Consent can be refused or withdrawn at any time. If consent is withdrawn, we will delete the photograph or video and not distribute it further.

When using photographs and videos in this way we will not accompany them with any other personal information about the child, to ensure they cannot be identified.

See also the Child Protection & Safeguarding policy and the Using digital device and social media policies.

Artificial intelligence (AI)

Artificial intelligence (AI) tools are now widespread and easy to access. Staff, pupils and parents/carers may be familiar with generative chatbots such as ChatGPT and Google Bard. Bourne Alliance MAT recognises that AI has many uses to help pupils learn, but also poses risks to sensitive and personal data.

To ensure that personal and sensitive data remains secure, no one will be permitted to enter such data into unauthorised generative AI tools or chatbots.

If personal and/or sensitive data is entered into an unauthorised generative AI tool, the Trust will treat this as a data breach, and will follow the personal data breach procedure.

See also relevant AI policies used by the school.

Consent

- Consent must be a positive indication. It cannot be inferred from silence, inactivity or pre-ticked boxes.
- Consent will only be accepted where it is freely given, specific, informed and an unambiguous indication of the individual's wishes.
- Where consent is given, a record will be kept documenting how and when consent was given.
- The trust ensures that consent mechanisms meet the standards of the GDPR. Where the standard of consent cannot be met, an alternative legal basis for processing the data must be found, or the processing must cease.
- Consent accepted under the DPA will be reviewed to ensure it meets the standards of the GDPR; however, acceptable consent obtained under the DPA will not be reobtained.
- Consent can be withdrawn by the individual at any time.
- The consent of parents will be sought prior to the processing of a child's data, except where the processing is related to preventative, or counselling services offered directly to a child.

The right to be informed

The privacy notice supplied to individuals in regard to the processing of their personal data will be written in clear, plain language, which is concise, transparent, easily accessible and free of charge.

If services are offered directly to a child, the trust will ensure that the privacy notice is written in a clear, plain manner that the child will understand.

In relation to data obtained both directly from the data subject and not obtained directly from the data subject, the following information will be supplied within the privacy notice:

- The identity and contact details of the controller, and where applicable, the controller's representative and the DPO.
- The purpose of, and the legal basis for, processing the data.
- The legitimate interests of the controller or third party.
- Any recipient or categories of recipients of the personal data.
- Details of transfers to third countries and the safeguards in place.
- The retention period of criteria used to determine the retention period.
- The existence of the data subject's rights, including the right to:
 - Withdraw consent at any time.
 - Lodge a complaint with a supervisory authority.
- The existence of automated decision making, including profiling, how decisions are made, the significance of the process and the consequences.

Where data is obtained directly from the data subject, information regarding whether the provision of personal data is part of a statutory or contractual requirement and the details of the categories of personal data, as well as any possible consequences of failing to provide the personal data, will be provided.

Where data is not obtained directly from the data subject, information regarding the source the personal data originates from and whether it came from publicly accessible sources, will be provided.

For data obtained directly from the data subject, this information will be supplied at the time the data is obtained.

In relation to data that is not obtained directly from the data subject, this information will be supplied:

- Within one month of having obtained the data.
- If disclosure to another recipient is envisaged, at the latest, before the data are disclosed.
- If the data are used to communicate with the individual, at the latest, when the first communication takes place.

The right of access - Subject access requests and other rights of individuals

- Individuals have the right to obtain confirmation that their data is being processed
- Individuals have the right to submit a subject access request (SAR) to gain access to their personal data in order to verify the lawfulness of the processing. Application forms are available from DPO@ba-mat.org.uk (see section below)
- The trust will verify the identity of the person making the request before any information is supplied.
- A copy of the information will be supplied to the individual free of charge; however, the trust may impose a 'reasonable fee' to comply with requests for further copies of the same information.
- Where a SAR has been made electronically, the information will be provided in a commonly used electronic format.
- Where a request is manifestly unfounded, excessive or repetitive, a reasonable fee will be charged.
- All fees will be based on the administrative cost of providing the information.
- All requests will be responded to without delay and at the latest, within one month of receipt.
- In the event of numerous or complex requests, the period of compliance will be extended by a further two months. The individual will be informed of this extension and will receive an explanation of why the extension is necessary, within one month of the receipt of the request.
- Where a request is manifestly unfounded or excessive, the trust holds the right to refuse to respond to the request. The individual will be informed of this decision and the reasoning behind it, as well as their right to complain to the supervisory authority and to a judicial remedy, within one month of the refusal.
- In the event that a large quantity of information is being processed about an individual, the trust will ask the individual to specify the information the request is in relation to.

Subject access requests

Individuals have a right to make a 'subject access request' to gain access to personal information that the school holds about them. This includes:

- Confirmation that their personal data is being processed
- Access to a copy of the data
- The purposes of the data processing
- The categories of personal data concerned
- Who the data has been, or will be, shared with
- How long the data will be stored for, or if this isn't possible, the criteria used to determine this period
- Where relevant, the existence of the right to request rectification, erasure or restriction, or to object to such processing
- The right to lodge a complaint with the ICO or another supervisory authority
- The source of the data, if not the individual
- Whether any automated decision-making is being applied to their data, and what the significance and consequences of this might be for the individual
- The safeguards provided if the data is being transferred internationally

Subject access requests can be submitted in any form, but we may be able to respond to requests more quickly if they are made in writing and include:

- Name of individual
- Correspondence address
- Contact number and email address
- Details of the information requested

If staff receive a subject access request in any form they must immediately forward it to the DPO.

Children and subject access requests

Personal data about a child belongs to that child, and not the child's parents or carers. For a parent or carer to make a subject access request with respect to their child, the child must either be unable to understand their rights and the implications of a subject access request, or have given their consent.

Children below the age of 12 are generally not regarded to be mature enough to understand their rights and the implications of a subject access request. Therefore, most subject access requests from parents or carers of pupils at our school may be granted without the express permission of the pupil. This is not a rule and a pupil's ability to understand their rights will always be judged on a case-by-case basis.

Responding to subject access requests

When responding to requests, we:

- May ask the individual to provide 2 forms of identification
- May contact the individual via phone to confirm the request was made
- Will respond without delay and within 1 month of receipt of the request (or receipt of the additional information needed to confirm identity, where relevant)
- Will provide the information free of charge
- May tell the individual we will comply within 3 months of receipt of the request, where a request is complex or numerous. We will inform the individual of this within 1 month, and explain why the extension is necessary

We may not disclose information for a variety of reasons, such as if it:

- Might cause serious harm to the physical or mental health of the pupil or another individual
- Would reveal that the child is being or has been abused, or is at risk of abuse, where the disclosure of that information would not be in the child's best interests
- Would include another person's personal data that we can't reasonably anonymise, and we don't have the other person's consent and it would be unreasonable to proceed without it
- Is part of certain sensitive documents, such as those related to crime, immigration, legal proceedings or legal professional privilege, management forecasts, negotiations, confidential references, or exam scripts

If the request is unfounded or excessive, we may refuse to act on it, or charge a reasonable fee to cover administrative costs. We will take into account whether the request is repetitive in nature when making this decision.

When we refuse a request, we will tell the individual why, and tell them they have the right to complain to the ICO or they can seek to enforce their subject access right through the courts.

Other data protection rights of the individual

In addition to the right to make a subject access request (see above), and to receive information when we are collecting their data about how we use and process it (see section 7), individuals also have the right to:

- Withdraw their consent to processing at any time
- Ask us to rectify, erase or restrict processing of their personal data (in certain circumstances)
- Prevent use of their personal data for direct marketing
- Object to processing that has been justified on the basis of public interest, official authority or legitimate interests
- Challenge decisions based solely on automated decision making or profiling (i.e. making decisions or evaluating certain things about an individual based on their personal data with no human involvement)
- Be notified of a data breach (in certain circumstances)
- Make a complaint to the ICO
- Ask for their personal data to be transferred to a third party in a structured, commonly used and machine-readable format (in certain circumstances)

Individuals should submit any request to exercise these rights to the DPO. If staff receive such a request, they must immediately forward it to the DPO.

The right to rectification

- Individuals are entitled to have any inaccurate or incomplete personal data rectified.
- Where the personal data in question has been disclosed to third parties, the trust will inform them of the rectification where possible.
- Where appropriate, the trust will inform the individual about the third parties that the data has been disclosed to.
- Requests for rectification will be responded to within one month; this will be extended by two months where the request for rectification is complex.
- Where no action is being taken in response to a request for rectification, the trust will explain the reason for this to the individual and will inform them of their right to complain to the supervisory authority and to a judicial remedy.

The right to erasure

Individuals hold the right to request the deletion or removal of personal data where there is no compelling reason for its continued processing.

Individuals have the right to erasure in the following circumstances:

- Where the personal data is no longer necessary in relation to the purpose for which it was originally collected/processed
- When the individual withdraws their consent
- When the individual objects to the processing and there is no overriding legitimate interest for continuing the processing
- The personal data was unlawfully processed
- The personal data is required to be erased in order to comply with a legal obligation
- The personal data is processed in relation to the offer of information society services to a child

The trust has the right to refuse a request for erasure where the personal data is being processed for the following reasons:

- To exercise the right of freedom of expression and information
- To comply with a legal obligation for the performance of a public interest task or exercise of official authority
- For public health purposes in the public interest
- For archiving purposes in the public interest, scientific research, historical research or statistical purposes
- The exercise or defence of legal claims

As a child may not fully understand the risks involved in the processing of data when consent is obtained, special attention will be given to existing situations where a child has given consent to processing and they later request erasure of the data, regardless of age at the time of the request.

Where personal data has been disclosed to third parties, they will be informed about the erasure of the personal data, unless it is impossible or involves disproportionate effort to do so.

Where personal data has been made public within an online environment, the trust will inform other organisations who process the personal data to erase links to and copies of the personal data in question.

The right to restrict processing

Individuals have the right to block or suppress the trust's processing of personal data.

In the event that processing is restricted, the trust will store the personal data, but not further process it, guaranteeing that just enough information about the individual has been retained to ensure that the restriction is respected in future.

The trust will restrict the processing of personal data in the following circumstances:

- Where an individual contests the accuracy of the personal data, processing will be restricted until the trust has verified the accuracy of the data

- Where an individual has objected to the processing and the trust is considering whether their legitimate grounds override those of the individual
- Where processing is unlawful and the individual opposes erasure and requests restriction instead
- Where the trust no longer needs the personal data but the individual requires the data to establish, exercise or defend a legal claim

If the personal data in question has been disclosed to third parties, the trust will inform them about the restriction on the processing of the personal data, unless it is impossible or involves disproportionate effort to do so.

The trust will inform individuals when a restriction on processing has been lifted.

The right to data portability

Individuals have the right to obtain and reuse their personal data for their own purposes across different services.

Personal data can be easily moved, copied or transferred from one IT environment to another in a safe and secure manner, without hindrance to usability.

The right to data portability only applies in the following cases:

- To personal data that an individual has provided to a controller
- Where the processing is based on the individual's consent or for the performance of a contract
- When processing is carried out by automated means

Personal data will be provided in a structured, commonly used and machine-readable form.

The trust will provide the information free of charge.

Where feasible, data will be transmitted directly to another organisation at the request of the individual.

Bourne Alliance Academy Trust is not required to adopt or maintain processing systems which are technically compatible with other organisations.

In the event that the personal data concerns more than one individual, the trust will consider whether providing the information would prejudice the rights of any other individual.

The trust will respond to any requests for portability within one month.

Where the request is complex, or a number of requests have been received, the timeframe can be extended by two months, ensuring that the individual is informed of the extension and the reasoning behind it within one month of the receipt of the request.

Where no action is being taken in response to a request, the trust will, without delay and at the latest within one month, explain to the individual the reason for this and will inform them of their right to complain to the supervisory authority and to a judicial remedy.

The right to object

The trust will inform individuals of their right to object at the first point of communication, and this information will be outlined in the privacy notice and explicitly brought to the attention of the data subject, ensuring that it is presented clearly and separately from any other information.

Individuals have the right to object to the following:

- Processing based on legitimate interests or the performance of a task in the public interest
- Direct marketing
- Processing for purposes of scientific or historical research and statistics.

Where personal data is processed for the performance of a legal task or legitimate interests:

- An individual's grounds for objecting must relate to his or her particular situation.
- The trust will stop processing the individual's personal data unless the processing is for the establishment, exercise or defence of legal claims, or, where the trust can demonstrate compelling

legitimate grounds for the processing, which override the interests, rights and freedoms of the individual.

Where personal data is processed for direct marketing purposes:

- The trust will stop processing personal data for direct marketing purposes as soon as an objection is received.
- The trust cannot refuse an individual's objection regarding data that is being processed for direct marketing purposes.

Where personal data is processed for research purposes:

- The individual must have grounds relating to their particular situation in order to exercise their right to object.
- Where the processing of personal data is necessary for the performance of a public interest task, the trust is not required to comply with an objection to the processing of the data.

Where the processing activity is outlined above, but is carried out online, the trust will offer a method for individuals to object online.

Privacy by design and privacy impact assessments

The trust will act in accordance with the GDPR by adopting a privacy by design approach and implementing technical and organisational measures which demonstrate how the trust has considered and integrated data protection into processing activities.

Data protection impact assessments (DPIAs) will be used to identify the most effective method of complying with the trust's data protection obligations and meeting individuals' expectations of privacy.

DPIAs will allow the trust to identify and resolve problems at an early stage, thus reducing associated costs and preventing damage from being caused to Bourne Alliance Academy Trust's reputation which might otherwise occur.

A DPIA will be used when using new technologies or when the processing is likely to result in a high risk to the rights and freedoms of individuals.

A DPIA will be used for more than one project, where necessary.

High risk processing includes, but is not limited to, the following:

- Systematic and extensive processing activities, such as profiling
- Large scale processing of special categories of data or personal data which is in relation to criminal convictions or offences

The trust will ensure that all DPIAs include the following information:

- A description of the processing operations and the purposes
- An assessment of the necessity and proportionality of the processing in relation to the purpose
- An outline of the risks to individuals
- The measures implemented in order to address risk

Where a DPIA indicates high risk data processing, the trust will consult the ICO to seek its opinion as to whether the processing operation complies with the GDPR.

Data security

- Confidential paper records will be kept in a locked filing cabinet, drawer or safe, with restricted access.
- Confidential paper records will not be left unattended or in clear view anywhere with general access.
- Digital data is coded, encrypted or password-protected, both on a local hard drive and on a network drive that is regularly backed up off-site.
- Where data is saved on removable storage or a portable device, the device will be kept in a locked filing cabinet, drawer or safe when not in use.
- Memory sticks will not be used to hold personal information unless they are password-protected and fully encrypted.

- All electronic devices are password-protected to protect the information on the device in case of theft.
- Where possible, the trust enables electronic devices to allow the remote blocking or deletion of data in case of theft.
- Cyber secure practices are in place – cyber security training has been carried out across the Trust, including the need for secure passwords. The expectation for cyber security and password protocols is also included in the staff handbook held on SharePoint
- Where Staff and governors/trustees use personal devices for trust purposes, this will only be via the trust approved cloud based services such as Office 365 and hosted environments. Localised hard drives, removable storage devices or other storage solutions must not be used on personal devices.
- Emails containing sensitive or confidential information are password-protected if there are unsecure servers between the sender and the recipient.
- Circular emails to parents are sent via Arbor so email addresses are not disclosed to other recipients.
- Where personal information that could be considered private or confidential is taken off the premises, either in electronic or paper format, staff will take extra care to follow the same procedures for security, e.g. keeping devices under lock and key. The person taking the information from the trust premises accepts full responsibility for the security of the data.

Before sharing data, all staff members will ensure:

- They are allowed to share it.
- That adequate security is in place to protect it.
- Who will receive the data has been outlined in a privacy notice.

Under no circumstances are visitors allowed access to confidential or personal information. Visitors to areas of the trust containing sensitive information are supervised at all times.

The physical security of the trust's buildings and storage systems, and access to them, is reviewed on a termly basis. If an increased risk in vandalism/burglary/theft is identified, extra measures to secure data storage will be put in place.

BA MAT takes its duties under the GDPR seriously and any unauthorised disclosure may result in disciplinary action.

The Trust Data Protection Officer is responsible for continuity and recovery measures are in place to ensure the security of protected data.

Data retention

- Data will not be kept for longer than is necessary.
- Unrequired data will be deleted as soon as practicable.
- Some educational records relating to former pupils or employees of the trust may be kept for an extended period for legal reasons, but also to enable the provision of references or academic transcripts.
- Paper documents will be shredded or pulped, and electronic memories scrubbed clean or destroyed, once the data should no longer be retained.
- The Trust has a retention policy

Data breaches

The term 'personal data breach' refers to a breach of security which has led to the destruction, loss, alteration, unauthorised disclosure of, or access to, personal data.

The Head in each school will ensure that all staff members are made aware of, and understand, what constitutes as a data breach as part of their continuous development training.

Where a breach is likely to result in a risk to the rights and freedoms of individuals, the relevant supervisory authority will be informed.

All notifiable breaches will be reported to the relevant supervisory authority within 72 hours of the trust becoming aware of it.

The risk of the breach having a detrimental effect on the individual, and the need to notify the relevant supervisory authority, will be assessed on a case-by-case basis.

In the event that a breach is likely to result in a high risk to the rights and freedoms of an individual, the trust will notify those concerned directly.

A 'high risk' breach means that the threshold for notifying the individual is higher than that for notifying the relevant supervisory authority.

In the event that a breach is sufficiently serious, the public will be notified without undue delay.

Effective and robust breach detection, investigation and internal reporting procedures are in place at the trust, which facilitate decision-making in relation to whether the relevant supervisory authority or the public need to be notified.

Within a breach notification, the following information will be outlined:

- The nature of the personal data breach, including the categories and approximate number of individuals and records concerned
- The name and contact details of the DPO
- An explanation of the likely consequences of the personal data breach
- A description of the proposed measures to be taken to deal with the personal data breach
- Where appropriate, a description of the measures taken to mitigate any possible adverse effects

Failure to report a breach when required to do so will result in a fine, as well as a fine for the breach itself.

Training

All staff and governors are provided with data protection training as part of their induction process.

Data protection will also form part of continuing professional development, where changes to legislation, guidance or the school's processes make it necessary.

Publication of information

BA MAT publishes a publication scheme on its website outlining classes of information that will be made routinely available, including:

- Policies and procedures
- Annual reports
- Financial information

Classes of information specified in the publication scheme are made available quickly and easily on request.

BA MAT will not publish any personal information, including photos, on its website without the permission of the affected individual.

When uploading information to the trust website, staff are considerate of any metadata or deletions which could be accessed in documents and images on the site.

DBS data

- All data provided by the DBS will be handled in line with data protection legislation; this includes electronic communication.
- Data provided by the DBS will never be duplicated.
- Any third parties who access DBS information will be made aware of the data protection legislation, as well as their responsibilities as a data handler.

Appendix 1: Personal data breach procedure

This procedure is based on [guidance on personal data breaches](#) produced by the Information Commissioner's Office (ICO).

- On finding or causing a breach or potential breach, the staff member, governor or data processor must immediately notify the Head in the relevant school
- The Head (as DPO) will investigate the report and determine whether a breach has occurred. To decide, the DPO will consider whether personal data has been accidentally or unlawfully:
 - Lost
 - Stolen
 - Destroyed
 - Altered
 - Disclosed or made available where it should not have been
 - Made available to unauthorised people
- Staff and governors will co-operate with the investigation (including allowing access to information and responding to questions). The investigation will not be treated as a disciplinary investigation
- If a breach has occurred or it is considered to be likely that is the case, the DPO will consult with Satswana for further guidance
- The DPO will make all reasonable efforts to contain and minimise the impact of the breach. Relevant staff members or data processors should help the DPO with this where necessary, and the DPO should take external advice when required (e.g. from IT providers). (See the actions relevant to specific data types at the end of this procedure)
- The DPO will assess the potential consequences (based on how serious they are and how likely they are to happen) before and after the implementation of steps to mitigate the consequences
- The DPO will work out whether the breach must be reported to the ICO and the individuals affected using the ICO's [self-assessment tool](#) and through consultation with Satswana
- The DPO will document the decisions (either way), in case the decisions are challenged at a later date by the ICO or an individual affected by the breach. Documented decisions are stored in a centralized Trust document which can be used for audit purposes
- Where the ICO must be notified, the DPO will do this via the [‘report a breach’ page](#) of the ICO website, or through its breach report line (0303 123 1113), within 72 hours of the school's awareness of the breach. As required, the DPO will set out:
 - A description of the nature of the personal data breach including, where possible:
 - The categories and approximate number of individuals concerned
 - The categories and approximate number of personal data records concerned
 - The name and contact details of the DPO
 - A description of the likely consequences of the personal data breach
 - A description of the measures that have been, or will be taken, to deal with the breach and mitigate any possible adverse effects on the individual(s) concerned
- If all the above details are not yet known, the DPO will report as much as they can within 72 hours of the school's awareness of the breach. The report will explain that there is a delay, the reasons why, and when the DPO expects to have further information. The DPO will submit the remaining information as soon as possible
- Where the school is required to communicate with individuals whose personal data has been breached, the DPO will tell them in writing. This notification will set out:
 - A description, in clear and plain language, of the nature of the personal data breach
 - The name and contact details of the DPO
 - A description of the likely consequences of the personal data breach
 - A description of the measures that have been, or will be, taken to deal with the data breach and mitigate any possible adverse effects on the individual(s) concerned
- The DPO will consider, in light of the investigation and any engagement with affected individuals, whether to notify any relevant third parties who can help mitigate the loss to individuals – for example, the police, insurers, banks or credit card companies

- The DPO will document each breach, irrespective of whether it is reported to the ICO. For each breach, this record will include the:
 - Facts and cause
 - Effects
 - Action taken to contain it and ensure it does not happen again (such as establishing more robust processes or providing further training for individuals)

Records of all breaches will be stored in the designated centralized tracking system.

- The Heads will consult with the Trust leaders to review how the breach happened to reflect on systems and process to prevent this happening again. This meeting will happen as soon as reasonably possible

Actions to minimise the impact of data breaches

We set out below the steps we might take to try and mitigate the impact of different types of data breach if they were to occur, focusing especially on breaches involving particularly risky or sensitive information. We will review the effectiveness of these actions and amend them as necessary after any data breach.

Some of the relevant actions which will be taken – depending on the type of risk/data processed include:

Sensitive information being disclosed via email (including safeguarding records)

- If special category data (sensitive information) is accidentally made available via email to unauthorised individuals, the sender must attempt to recall the email as soon as they become aware of the error
- Members of staff who receive personal data sent in error must alert the sender and the DPO as soon as they become aware of the error
- If the sender is unavailable or cannot recall the email for any reason, the DPO will ask Primary to attempt to recall it from external recipients and remove it from the school's email system (retaining a copy if required as evidence)
- In any cases where the recall is unsuccessful or cannot be confirmed as successful, the DPO will consider whether it's appropriate to contact the relevant unauthorised individuals who received the email, explain that the information was sent in error, and request that those individuals delete the information and do not share, publish, save or replicate it in any way
- The DPO will endeavor to obtain a written response from all the individuals who received the data, confirming that they have complied with this request
- The DPO will carry out an internet search to check that the information has not been made public; if it has, we will contact the publisher/website owner or administrator to request that the information is removed from their website and deleted
- If safeguarding information is compromised, the DPO will contact Kent Safeguarding for advice
